

Daniel Osman

Business Analytics & AI Strategy Analyst | Data-Driven Decision-Making

Amsterdam, Netherlands - Jeddah, Saudi Arabia

P: +31 644799364 | Website: dosman.vercel.app | LinkedIn: //daniel-osman22 | Github: Daniel5452

SKILLS

Core Skills: Strategic Problem-Solving | Data-Driven Decision Making | KPI Analysis | Business Intelligence | Stakeholder Management | Cross-functional Collaboration | Business Communication & Presentation | Process Optimization | Financial & Quantitative Analysis | Project Evaluation | Project Ownership | Adaptability | Time Management

Technical Skills: Python, SQL, R, MongoDB | BigQuery, Airflow, ETL Pipelines | API Development | Business Intelligence & KPI Dashboards | Tableau, Plotly, Dash, Streamlit, Matplotlib | LLM Applications, AI Automation & Analytics Agents | Anomaly Detection, Time Series Forecasting & A/B Testing | Pandas, NumPy, Scikit-learn | Financial & Impact Modeling | Gurobi | Git | Microsoft Excel & PowerPoint

Languages: Fluent in Arabic and English (C2); Beginner Dutch (A1)

EDUCATION

University of Amsterdam

MSc in Data Science and Business Analytics

Amsterdam, The Netherlands

September 2025 - August 2026 (Expected)

Relevant Coursework: Machine Learning & Optimisation, Deep Learning & Reinforcement Learning, Impact Evaluation, Explainable & Trustworthy AI

Thesis Focus: LLM-based anomaly detection and business intelligence for gaming analytics, focusing on improving the reliability and interpretability of AI analytics systems.

Eindhoven University of Technology

BSc in Data Science, Grade (7.5/10)

Eindhoven, The Netherlands

August 2022 - August 2025

Relevant Coursework: Data Analytics, Linear Algebra, Statistical Computing, Econometrics,

Natural Language Processing, Data Mining, Data Management, Combinatorial Optimization

Thesis Focus: AI-driven business optimization project integrating financial efficiency modeling for industrial operations, Grade (8.5/10)

American International School of Jeddah

Graduated with High Honors, Grade (3.9/4)

Jeddah, Saudi Arabia

Sept. 2008 - June 2022

WORK EXPERIENCE

Tencent Holdings Ltd.

Data Science & Business Optimization Intern

Amsterdam, The Netherlands

Apr. 2026 - Present

- **Delivered KPI and player-behavior analysis to executives across multiple countries for globally recognized titles** including Clash of Clans, Brawl Stars, Delta Force, and Dune: Awakening, serving tens of millions of active players globally, covering revenue, retention, engagement, and monetization.
- **Support data-driven decision making** across gaming products by developing executive-level dashboards, automated reports, and business presentations
- **Translate complex analytical findings** and KPIs into actionable recommendations for technical and non-technical stakeholders
- **Research and implement anomaly detection**, forecasting, and LLM-powered analytics capabilities to improve internal AI tools and business intelligence processes across Tencent studios
- Collaborate with analytics, data engineering, marketing, and product teams to improve the accessibility and usability of large-scale gaming datasets and LLMs in practice

VBTI Consultancy B.V.

AI Engineering and Business Optimization Intern

Eindhoven, The Netherlands

Feb. 2025 – Aug. 2025

- **Built and deployed an AI-driven automation solution** across multiple business units, delivering strategic recommendations that reduced operational costs by **75%** and significantly improved profit margins on specific projects
- **Built and implemented a pseudo-labeling AI-powered tool** to automate operation processes, enabling further operational efficiencies and scalable performance improvements
- Developed comprehensive frameworks and conducted risk assessments to support senior management decision-making processes
- Facilitated stakeholder workshops and collaborated with technical and business teams to identify optimization opportunities and drive implementation of operational excellence initiatives

Reef Support, via FruitPunch ai. (University Sponsored)
(Environmental) AI Strategy Consultant

Eindhoven, The Netherlands
Sept. 2024 – Nov. 2024

- **Developed an automated computer vision system** to monitor coral reef health and support marine ecosystem conservation efforts
- Coordinated between research teams and environmental policy stakeholders to identify operational challenges and define success criteria for ecosystem health assessment processes
- Led development of cost-effective monitoring framework achieving **83% accuracy** in automated assessment systems
- Delivered strategic recommendations to environmental organizations for conservation strategy optimization based on comprehensive data analysis and stakeholder requirements

London Metropolitan Police (University Sponsored)
Data Science & Public Strategy Analytics Project

Eindhoven, The Netherlands
April 2024 – July 2024

- **Advised the London Metropolitan Police Service on community-relations strategy** by analyzing use-of-force cases and borough-level performance, delivering evidence-based recommendations to senior stakeholders
- Built random forest models to identify the drivers of high-force incidents and forecast performance across boroughs, translating model outputs into prioritized, borough-level actions for resource allocation
- Developed an analytical framework benchmarking departmental performance to surface improvement opportunities and inform strategic planning decisions
- Managed stakeholders across academic and government partners, ensuring recommendations were rigorous, actionable, and responsibly implemented in policy

PROJECTS

Thoracic Disease Classifier (AI for Medical Imaging) Grade (9/10)

Feb 2024

- Fine-tuned CNNs like Res-Net50 & EfficientNet-B7 to classify thoracic diseases from 25,000+ chest X-rays in PyTorch with GPU acceleration

Financial Risk Analytics and Credit Intelligence Dashboard Grade (8/10)

Jan 2024

- Developed comprehensive credit risk assessment platform using Python (Dash/Plotly), enabling real-time portfolio monitoring and strategic lending decisions for financial stakeholders

Airline Customer Experience Analytics (Twitter API Analysis) Grade (8/10)

June 2023

- Built a natural language processing pipeline using Twitter API and NoSQL (MongoDB) to analyze customer sentiment patterns for major airlines (Lufthansa, American Airlines)
- Applied AI-driven sentiment classification models to extract actionable insights from social media data

Smart Compression Vest Development for Individuals with ASD

Nov. 2023

- Designed IoT-enabled wearable solution with a mobile app integration that creates personalized compression therapy for individuals with Autistic Spectrum Disorders

Leadership

US Stock Market Analysis and Investment at AISJ
Independent Activity with other Members

Jeddah, Saudi Arabia
Mar. 2021 - Feb. 2022

- Conducted comprehensive market research and competitive analysis within the U.S. Energy sector, developing investment hypotheses through fundamental and technical analysis
- Led collaborative research efforts with peer analysts, achieving 284% portfolio returns through systematic evaluation of market trends and risk assessment

Model United Nations (MUN)
Delegate

New York City, NY
Feb. 2019

- Collaborated with a team to research and discuss issues in developing countries in East Asia, including topics such as poverty, education, and sustainable development.
- Presented solutions and policy recommendations at the United Nations Headquarters in New York City during the Model United Nations conference.
